In monetary affairs there is very little worthy of note since last report. The check in the upward prices of grain is not looked upon as portending a decline, the scarcity of wheat in the country alone being sufficient to maintain prosent quotations. The shipment of gold to Europe it is not thought will continue, as the exportation of grain, should the present troubles continue, would soon cause a reflux. The rates for money are unchanged, and the supply is abundant for all legitimate purposes. In New York the market continues to be quoted very easy, the rates for call loans being firm at 2922 per cent. Government bonds fluctuate but little, all classes, save the sixes of 1881 and the currency sixes, being stronger. The rates for gold have advanced slightly; to-day's quotations are 1074. In State bonds there is less activity, with as light decline in Virginia consols, the rates yesterda, being at 70ga71. No sales of local railroad secui. ties reported.
